

Security without boundaries

Helping you create a more secure workplace

The world of work is changing all around us.

Widespread access to new digital services is transforming every aspect of business, especially how your workforce wants to operate.

They want integrated tools that simplify collaboration and help them quickly connect with their co-workers – without sacrificing security.

They're looking for a platform that is:

SECURE

REAL-TIME

TRANSPARENT

INTEGRATED

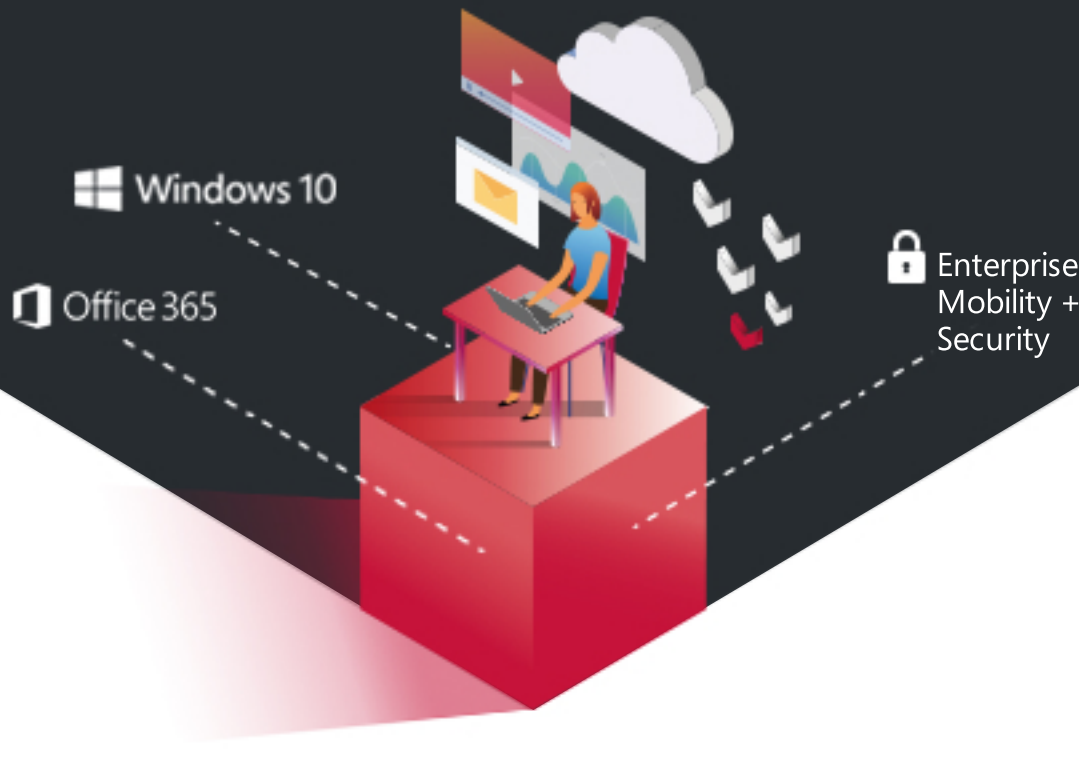

FLEXIBLE

STRAIGHTFORWARD

With Microsoft 365 Enterprise, you can now give them what they need to succeed on whatever device they choose, confident you have every security endpoint covered.

The safer, simpler way to safeguard your business

A cloud-based productivity solution, Microsoft 365 Enterprise brings together Office 365, Windows 10 and Enterprise Mobility + Security in a bundle that offers advanced protection, while simplifying your General Data Protection Regulation (GDPR) compliance journey and lowering your Total Cost of Ownership.

Key reasons to upgrade

Now the GDPR deadline has passed, there's an increasing focus on data protection.

68%

of IT leaders asked said they plan to invest in endpoint security

44%

of IT leaders asked said they will **migrate to Windows 10** in 2018

The number of organisations planning to adopt encryption is up by

94%

So why Microsoft 365 Enterprise?
